

SHIPPED EMBRYO INSTRUCTIONS

For completing **Mare Reservation Fax Form**

Section 1. & Section 4. **Breeding Day:** Fax us this information on the first day that the mare is bred with breeding date included. If mare is bred more than one time, please fax us the dates each time. This will give us adequate time to make sure we have a recipient mare lined up for your embryo.

Section 2. **Ovulation Day:** Fax us another copy of this information the day your mare ovulates with ovulation date and flush date included. If your mare ovulates more than one follicle, please include the number of follicles ovulated so we can have multiple recipient mares lined up in case you retrieve more than one embryo.

Section 3. **Flush Day:** Fax us this form for the final time indicating the flush results and shipping information if applicable. If you ship via commercial airlines, the name of the airline, flight number and arrival time are necessary so we can arrange for pickup at the airport in Amarillo, Texas.

PLEASE put a copy of the completed Mare Reservation Fax Form in the equitainer for each embryo shipped. Clearly label each tube so we have no questions who the embryo belongs to and who the donor mare and stud is.

Since we receive numerous embryos from many places, all of this information is vital.

We must have adequate notification and time to ensure you have a recipient mare for each embryo.

YOUR COOPERATION IS GREATLY APPRECIATED!!
